

Build a rustic structure

By Ray R. Dunakin III

In the December 2012 and February 2013 issues, Ray Dunakin describes how to make a rustic cabin out of styrene. Use these full-size drawings of the walls as a template, and follow along with Ray to learn how to make this impressive structure.

This small, beautifully weathered, "wooden" cabin is made almost entirely of styrene. The techniques used to achieve these effects are thoroughly described in this two-part series.

Trace door and window frames to determine actual size of openings
