

Outer mainline loop

Two straight passing tracks.
Lionel no. 12895 double-track signal bridge can alert operators to the presence of a train

Two storage tracks with bumpers. An operator can park locomotives or rolling stock on these sidings

Two curved passing tracks

Inner mainline loop

Commercial district with Lionel nos. 12713 gateman and shed, 12886 flood-light tower, and 32298 hobby shop. Further development can include Lionel and MTH accessories, Plasticville buildings, vehicles, and figures

Four turnouts link the mainline loops. Depending on how an operator throws the turnouts, the loops can be independent or interconnected

Industrial area with two stub-end sidings. Accessories give this area a purpose and make it entertaining for operators. Postwar and modern-era coal and log loaders, along with a milk car platform and a cattle yard have been installed. You can add structures, lights, and a variety of details
