

The roadway is a key scenic element that runs from front center to right rear

Lengthening the layout by 2 to 4 feet would allow for more spur tracks and accessories

45-degree crossing – Consider wiring the crossing so that only one route is powered at a time, by using either a toggle switch or a relay

A lone siding on the main table hosts a coal and oil dealer

Spur tracks

The optional layout extension has a coal transloading facility and an oil well
